

# EMPIRE LIFE CLASS PLUS 2

**Guaranteed retirement  
income for life™**

## SCENARIO

### **SAVING FOR RETIREMENT SINGLE TIERED LWA TAKING INCOME LATER**

Sarah aged 50, plans to retire in 15 years and has \$250,000 to invest. She needs her portfolio to grow before she retires and wants an investment that will provide her with predictable income in retirement. Sarah is concerned that poor market performance may erode her savings and her retirement plans.

Empire Life Class Plus 2 can give Sarah the peace of mind she needs.

With Class Plus 2 Sarah will receive guaranteed retirement income for life<sup>1</sup>. She can increase her future income through the Income Base Bonus<sup>2</sup> regardless of market conditions and take advantage of the investment growth through triennial Income Base Resets when the markets are strong.

<sup>1</sup> Provided there are no Excess Withdrawals.

<sup>2</sup> Income Base Bonus is a notional amount added to the Income Base at the end of each calendar year if no withdrawals are made for that year.

# HOW CLASS PLUS 2 CAN INCREASE SARAH'S GUARANTEED RETIREMENT INCOME IN **DOWN MARKETS**<sup>1</sup>

The Income Base Bonus contributes to Sarah's potential future income and protects her against downside market risk. Despite poor market conditions, Sarah's Income Base would grow from \$250,000 to \$425,000, assuming an Income Base Bonus of 5% for each year she did not make a withdrawal.<sup>2</sup> By the time she is ready to retire and start withdrawing her money, she would have an annual income of \$17,000.<sup>3</sup>

# HOW CLASS PLUS 2 CAN INCREASE SARAH'S GUARANTEED RETIREMENT INCOME IN **UP MARKETS**<sup>4</sup>

Under strong market conditions, in addition to the 5% Income Base Bonus,<sup>2</sup> Sarah would also benefit from the automatic triennial reset feature. Every third Class Plus 2 Anniversary Date an Income Base Reset may occur. The Income Base Reset occurs when the market value of the Fund Class Units at the credit of her contract is greater than the current Income Base, which results in a higher Income Base.

When Sarah is ready to retire at age 65, her annual income would be \$33,330 (4.0% of her \$833,250 Income Base).<sup>5</sup>

<sup>1</sup>For illustrative purposes only, the fund accumulates at a rate of return of -1.5%. A monthly Class Plus Fee of 0.092% (1.10% annually) of the Income Base was charged.  
<sup>2</sup>Income Base Bonus is a notional amount added to the Income Base at the end of each calendar year if no withdrawals are made for that year. <sup>3</sup>Based on her Income Base of \$425,000 x 4.0% (Single Tiered LWA percentage at age 65). <sup>4</sup>For illustrative purposes only, the scenario's market value is based on historical rates of return using a blend of 80% S&P/TSX and 20% DEX Universe Bond Index, from December 31, 1991 to December 31, 2011, with an average rate of return of 11.48%. The monthly Class Plus Fee is 0.092% of the Income Base. <sup>5</sup>Provided there are no Excess Withdrawals. Refer to the Class Plus 2 Information Folder for complete details.
